

Liquid Multi-Phase Technology For All-Day Fat Burning For Women

Liquid MULTI-PHASE Fat-Burning Technology For Women

LIPO-6 Hers is a highly advanced female fat burner using a new and superior liquid MULTI-PHASE™ technology. This unique MULTI-PHASE™ technology combines rapid liquid capsule delivery with controlled-release inside capsule technology. What this means is that LIPO-6 Hers is the only female fat burner that has multiple release phases, both fast and extended:

Phase #1 Rapid Release Liquid Capsule: The outer liquid capsule of LIPO-6 Hers ensures a rapid and almost instant uptake of its appetite-suppressing, fat-burning and energy-promoting ingredients. Within minutes of taking LIPO-6 Hers you will feel all the liquid pharmaceutical-grade compounds working for you.

Phase #2 Controlled and Extended Release Inside Capsule: Unlike standard fat-burning formulas, whose effects come and go quickly, LIPO-6 Hers continues to work for you over an extended period of time. By selectively putting some of the ingredients into a separate capsule, that sits inside the liquid capsule, the absorption rate can now be controlled. This greatly extends the amount of time these ingredients are active, which means that the appetite-suppressing and fat-burning effects of LIPO-6 Hers continue to work for many hours allowing you to consistently lose weight around the clock.

LIPO-6 Hers is the first and only fat burner specifically designed for women that offers speed and duration. A quick and rapid onset of its powerful fat-burning and energy-promoting effects, combined with a controlled and extended release, will ensure maximum results day and night.
